

TWO FACTOR AUTHENTICATION

What is 2 Step Verification?

2 Step Verification is a rotating 6 digit code that you will use in addition to your User ID and password. It is provided to you via text, phone call, or application lookup to confirm your identity.

Why 2 Step Verification?

This adds an extra layer of security to help keep your information safe. In fact, 2 Step Verification prevents 85% of data breaches.

When will I use 2 Step Verification?

You will use 2 Step Verification when accessing Walmart information from a personal device.

HOW DO I SETUP 2 FACTOR AUTHENTICATION?

- Go to WMLINK/2STEP
 - Note: if that does not work for you, go to: https://one.walmart.com/content/uswire/en_us/work1/tools-and-reports/s-u/two-step-verification.html
- Then choose which option you want to use for verification

2 Step Verification

You can elect to receive a text message that contains a security code. This code can then be entered to authenticate your device off the Walmart network.

Steps

1. Enter your cell phone number, including area code (e.g. 555-555-5555) to receive a confirmation code by automated text message. Message and data rates may apply. Click button below to receive confirmation code.

--Select Country Code-- ▾

Phone Number

Send Code

2. Enter the security code that was sent to your phone and click submit to complete registration.
